

CA06

Science, Technology, Environment and Defence in the News

Expect 4-6 questions a paper from this chapter — typically one ISRO item, one DRDO or defence item, one environment or wildlife number, and one health or global-science item. Every fact below is as of September 2026. October and November 2026 developments you must add yourself.

Science and technology is the biggest single bucket in the RAS paper — 18 to 23 questions every year — and a good slice of it is current affairs rather than textbook science. This chapter is that slice: what ISRO launched, what DRDO tested, which exercise was held where, what COP30 agreed and how many Ramsar sites India now has. The facts are recent, datable, and RPSC asks them straight.

Science, Tech, Environment & Defence (to Sept 2026)

ISRO

- CMS-03 on LVM3-M5, 2 Nov 2025
- BlueBird Block-2, LVM3-M6, 24 Dec 2025
- PSLV-C62 FAILED, 12 Jan 2026
- EOS-05 on GSLV-F17, 4 Sept 2026
- Gaganyaan G1 + Vyommitra

Missiles / DRDO

- Agni-5 MIRV, 8 May 2026
- BMD AD-2 interceptor, June 2026
- Rudram-II and Rudram-III
- Project Kusha, NASM-MR

Platforms & numbers

- INS Dunagiri, Sanshodhak, Agray
- AMCA RFP, May 2026
- C-295 at Vadodara, 10 June 2026
- Exports Rs 38,424 crore

Exercises

- MILAN, Visakhapatnam
- Vayushakti-26, Pokhran
- Ajeya Warrior, Bold Kurukshetra in Rajasthan
- Malabar, Yudh Abhyas

AI / chips / quantum

- India AI Impact Summit, Feb 2026
- New Delhi Declaration
- Semicon 2.0, 15 July 2026
- NQM 1,000 km QKD

Health

- Ebola PHEIC, May 2026
- HPV drive, 14-year-old girls
- Trachoma-free, April 2025
- 25% of world TB burden

Climate

- COP30 Belem, Nov 2025
- 'Global Mutirao' package
- Triple adaptation finance by 2035
- Just Transition Mechanism

Wetlands & wildlife

- 101 Ramsar sites, Aug 2026
- Glaw Lake is the 101st
- Rajasthan has 5 Ramsar sites
- Tigers 3,682, lions 891

Global science

- Nobel Physics: quantum circuit
- Nobel Chemistry: MOFs
- Nobel Medicine: immune tolerance
- Sarnath = 45th UNESCO site

How to read this chapter — and what RPSC actually does with it

Do not try to understand the science here. RPSC does not test understanding in this bucket. It tests recall of a name, a place, a date or a number. Which rocket carried which satellite. Where the exercise was held. How many Ramsar sites. Who chaired COP30. So read this chapter the way you read a list of kings and their capitals — pair by pair.

- Every item here is dated. Learn the fact WITH its date; RPSC builds chronology questions out of exactly this.
- Launch vehicle to satellite, exercise to country, missile to range — these pairings are the match-the-following fodder.
- Anything with a running count — Ramsar sites, tiger reserves, cheetahs — can change before December. Learn the number and the as-of date together.
- Rajasthan links inside a science question score double: Pokhran, Keoladeo, Sambhar, Khichan, Menar, Siliserh. Mark them.
- Everything below is current as of September 2026.

YAAD RAKHO

Remember five anchor dates for the whole chapter: 2 November 2025 (CMS-03), 10-22 November 2025 (COP30 at Belem), 12 January 2026 (PSLV-C62 fails), 16-21 February 2026 (India AI Impact Summit), 4 September 2026 (EOS-05). Nearly every ordering question in this chapter is built from dates in that band.

ISRO — the launch record from November 2025 to September 2026

ISRO's window here has one very heavy launch, one big commercial launch, one failure and one first. Learn all four as a set. The Chairman, as of September 2026, is V. Narayanan, who is also Secretary, Department of Space. Note that name — RPSC likes asking who heads an organisation.

The four missions to memorise (Nov 2025 – Sept 2026)

Mission	Date	Payload and outcome
LVM3-MS	2 November 2025	CMS-03, about 4,400 kg, into Geosynchronous Transfer Orbit

Mission	Date	Payload and outcome
LVM3-M6	24 December 2025	BlueBird Block-2 for AST SpaceMobile, into Low Earth Orbit
PSLV-C62	12 January 2026	EOS-NI + 14 co-passengers — FAILED, anomaly in third stage (PS3)
GSLV-F17	4 September 2026	EOS-05 into sub-GTO — 19th flight of the GSLV

TRAP

The 'heaviest satellite' trap — read this twice. CMS-03 (2 November 2025, LVM3-M5) was the heaviest COMMUNICATION satellite launched to GTO from Indian soil, about 4,400 kg. Then on 24 December 2025 LVM3-M6 lifted BlueBird Block-2, which ISRO Chairman V. Narayanan called the heaviest satellite ever lifted from Indian soil by an Indian launcher. So never write 'CMS-03 is the heaviest satellite launched from India' without the words 'at the time'. If the option says heaviest communication satellite to GTO — CMS-03. If it says heaviest satellite from Indian soil — as of September 2026, BlueBird Block-2.

- BlueBird Block-2 belongs to AST SpaceMobile (USA), a direct-to-mobile satellite constellation.
- It was a commercial mission of NewSpace India Limited (NSIL), ISRO's commercial arm — remember NSIL for the 'which arm of ISRO' question.
- PSLV-C62 was ISRO's first mission of 2026 and its second PSLV failure within a year, after PSLV-C61.
- EOS-05 is India's FIRST imaging satellite in geosynchronous orbit — that superlative is the examinable bit.
- A geosynchronous imaging satellite stares at the same large area again and again: agriculture, disaster response, land monitoring.
- Gaganyaan sequence: uncrewed first. G1 flies on LVM3 carrying the humanoid robot Vyommitra; the first crewed flight (H1) is targeted for 2027.
- Vehicle logic in one line — PSLV for polar and small commercial loads, GSLV for geosynchronous, LVM3 for the heavy lifts and Gaganyaan.

Which ISRO vehicle carries what - the logic behind the launches

ISRO chronology in this window — learn the order

ASKED IN RAS

ISRO launch-vehicle-to-satellite matching was asked in RAS Pre 2013, 2016, 2018 and 2023 — one of the most reliable science repeats. The old record they lean on is PSLV-C37 (February 2017), 104 satellites in a single flight. Know the old record AND the four new missions above.

DRDO — missiles, interceptors and the systems that get asked

DRDO has appeared in every RAS paper since 2016. The pattern is simple: a system name and what it does, or a test and where it was conducted. Two sites do most of the work — Dr APJ Abdul Kalam Island (Wheeler Island) off Odisha for the big missiles, and Chandipur for shorter-range trials.

Systems in the news, 2025-26

System	What it is	Key fact
Agni-5 (MIRV)	Long-range ballistic missile	Advanced flight test 8 May 2026, Dr APJ Abdul Kalam Island, Odisha
AD-2	Ballistic missile defence interceptor	Tests 10-11 June 2026; described as reaching 'intercontinental class'
Rudram-II	Anti-radiation missile	Range about 300 km
Rudram-III	Anti-radiation missile	Range about 550-600 km
Project Kusha	Long-range surface-to-air defence	350+ km; induction target 2028-29
NASM-MR	Naval anti-ship missile, medium range	About 350 km; maiden trial completed

- **MIRV = Multiple Independently Targetable Re-entry Vehicle.** One missile, several warheads, each on a different target. India first demonstrated it under Mission Divyastra.
- **Ballistic Missile Defence:** three flight tests on 10-11 June 2026 validated the multi-layered system.
- An anti-radiation missile homes in on enemy radar emissions — that is what Rudram does.
- **Range ladder to memorise:** Rudram-II about 300 km, NASM-MR about 350 km, Kusha 350+ km, Rudram-III about 550-600 km.
- Do not mix the families: AD-1 and AD-2 are BMD interceptors, Astra is air-to-air, Akash is surface-to-air, Agni is ballistic.

The DRDO range ladder - longest range at the top

Rudram-III

anti-radiation missile

550-600 km

Project Kusha

long-range SAM; induction 2028-29

350+ km

NASM-MR

naval anti-ship, medium range

about 350 km

Rudram-II

anti-radiation missile

about 300 km

ASKED IN RAS

DRDO in every RAS Pre since 2016 — Lukoskin (the vitiligo drug), the beyond-visual-range missile Astra, MANPADS, and the DRDO motto 'Balasya Mulam Vigyanam' (strength has its source in science). Learn those old staples alongside the new tests; RPSC mixes both in one question.

Platforms, production numbers and who sits in the chair

Pure recall here — three ships, two aircraft programmes, three numbers, one appointment. Take them in that order and do not let the ship names blur.

- 21 June 2026, three commissionings on one day: INS Dunagiri (Project 17A stealth frigate), INS Sanshodhak (Survey Vessel Large), INS Agray (Arnala-class anti-submarine warfare craft).
- All three had over 75% indigenous content — that percentage is the examinable detail.
- AMCA, the Advanced Medium Combat Aircraft, is India's FIFTH-generation fighter. RFP issued 27 May 2026 to three shortlisted development partners; first flight targeted 2032, deliveries from 2035.
- The first India-assembled C-295 transport aircraft flew on 10 June 2026 from the Tata-Airbus facility at VADODARA — India's first private-sector military aircraft assembly line.
- Lt Gen Dhiraj Seth was appointed Chief of the Army Staff on 13 June 2026.
- Trick for the ships: D-S-A on 21 June. Dunagiri fights, Sanshodhak surveys (sanshodhan = survey/research), Agray hunts submarines.

The defence numbers for FY 2025-26

Item	Figure
Defence production	About Rs 1.78 lakh crore — a record
Defence exports	About Rs 38,424 crore, roughly \$4.1 billion — a 63% jump
DFPDS-2026	Unveiled 4 June 2026; delegates procurement powers of Rs 1.25+ lakh crore a year

TRAP

AMCA is FIFTH-generation, not fourth. RPSC's 'which pair is NOT correctly matched' questions live on this one. And the C-295 line is at Vadodara — not Hyderabad, not Nashik, not Kanpur.

Military exercises — the highest-yield matching topic in defence

Exercises are asked as pure matching — name to partner country, or name to place. There is no logic to reason out, only pairs to learn. Do 2026 first, then 2025, and mark the ones held in Rajasthan, because those are the ones RPSC will reach for.

Exercises 2026

Exercise	Partner or type	Where
MILAN 2026	Multilateral naval	Visakhapatnam; theme 'Camaraderie, Cooperation, Collaboration'
Vayushakti-26	IAF integrated firepower demonstration	Pokhran Range, Jaisalmer, RAJASTHAN
Khanjar-XIII	India-Kyrgyzstan special forces	Assam
Dharma Guardian	India-Japan	Uttarakhand
Vajra Prahar	India-USA special forces	Himachal Pradesh
Dosti-17	India-Sri Lanka-Maldives coast guards	Male
Lamitiye	India-Seychelles	Seychelles

Exercises 2025

Exercise	Partner	Where
Malabar-2025	Quad — India, USA, Japan, Australia	Near Guam
Ajeya Warrior-25	India-United Kingdom	RAJASTHAN
Bold Kurukshetra	India-Singapore	RAJASTHAN
Yudh Abhyas 2025	India-United States	Alaska, USA — NOT on Indian soil
Trishul	Tri-service, Indian	Along the Pakistan border

Exercise	Partner	Where
Konkan / JAIMEX / SLINEX / Garuda	UK / Japan / Sri Lanka / France	Naval and air bilaterals
TROPEX	Indian Navy's largest exercise	Indian Ocean Region

Exercises held on Indian soil - which state

Rajasthan hosted three - Vayushakti-26 at Pokhran, Ajeya Warrior-25 and Bold Kurukshetra.

YAAD RAKHO

Country hooks that never fail: Khanjar = Kyrgyzstan (both K), Lamitiye = Seychelles, Dharma Guardian = Japan, Vajra Prahar and Yudh Abhyas = USA, Garuda = France, SLINEX = Sri Lanka, Dosti = Sri Lanka + Maldives coast guard. Two location catches: Yudh Abhyas 2025 was in Alaska, and Khanjar-XIII was in Assam — Himachal was Vajra Prahar.

AI, semiconductors, quantum — and the 2025 science Nobels

India hosted the year's big AI event. The India AI Impact Summit ran 16-21 February 2026 at Bharat Mandapam, New Delhi, with over 100 countries and 20 international organisations. It closed with the NEW DELHI DECLARATION, endorsed by 92 countries and organisations. Venue, dates, declaration name — that is the question.

- Summit outputs: Global AI Impact Commons; Equitable AI Transition Playbook (with the ILO); Charter for Democratic Diffusion of AI; Trusted AI Commons.
- Also launched: Alliance for Advancing Inclusion Through AI (with UNICEF) and a Network of AI for Science Institutions.
- Investment pledges around the summit crossed \$200 billion.
- Reliance pledged \$110 billion over seven years; Google announced a \$15 billion AI hub at VISAKHAPATNAM; Lightspeed \$10 billion; General Catalyst \$5 billion.
- IndiaAI Mission GPU capacity: rising from over 38,000 to over 58,000 GPUs.

Semiconductors — India Semiconductor Mission 2.0

- The Union Cabinet approved the Semicon 2.0 framework on 15 July 2026 with an outlay of about Rs 1,27,500 crore; the first phase was Rs 76,000 crore.
- Twelve manufacturing units approved, cumulative investment over Rs 1.64 lakh crore — one silicon fab, one silicon carbide fab, one gallium nitride micro-LED display fab and nine packaging units.
- Commercial production has begun in three units — Micron (Sanand, Gujarat), CG Semi and Kaynes.
- Micron's Sanand plant is India's first semiconductor assembly and test facility.
- The first full silicon fab is scheduled for commissioning around 2028 (as of September 2026).

Quantum — the National Quantum Mission

- Approved by the Union Cabinet in April 2023 under the Department of Science and Technology, with an outlay of about Rs 6,000 crore up to 2030-31.
- Targets: intermediate-scale quantum computers of 50 to 1,000 physical qubits within eight years, and a quantum communications network of about 2,000 km.
- April 2026 — the Mission announced a 1,000 km secure quantum communication (quantum key distribution) milestone, among the longest QKD deployments anywhere.
- It runs through four thematic hubs: quantum computing, quantum communication, quantum sensing and metrology, quantum materials and devices.
- Link this to the 2025 Physics Nobel below — that prize was for quantum behaviour in a hand-held superconducting circuit, the foundation of quantum computing.

The technology mission chronology

Nobel Prizes 2025 — the three science prizes

Prize	Laureates	For
Physics	John Clarke, Michel Devoret, John Martinis	Macroscopic quantum tunnelling and energy quantisation in an electric circuit
Chemistry	Susumu Kitagawa, Richard Robson, Omar Yaghi	Metal-organic frameworks (MOFs)
Medicine	Mary Brunkow, Fred Ramsdell, Shimon Sakaguchi	Peripheral immune tolerance — regulatory T cells

Health, disease and vaccines

Health current affairs comes in two shapes — an outbreak or emergency declaration, and an elimination or certification milestone. Keep the two lists apart in your head and you will not mix them up in the exam hall.

- May 2026 — the WHO declared EBOLA a Public Health Emergency of International Concern (PHEIC) for outbreaks in the DRC and Uganda; a Sudan-strain vaccine trial began in Uganda.
- April 2025 — India was certified TRACHOMA-free by the WHO. Trachoma is a bacterial eye infection and a leading infectious cause of blindness.
- India carries about 25% — one-fourth — of the global TB burden (Global TB Report 2025).
- March 2026 — nationwide HPV vaccination campaign launched for 14-YEAR-OLD girls, against cervical cancer.
- January 2026 — India's first 'AI clinic' opened at GIMS, Greater Noida.

Vaccines and therapies in the news — learn the developer

Name	Against	Developer
R21/Matrix-M	Malaria	University of Oxford; manufactured by Serum Institute of India
DengiAll	Dengue	ICMR with Panacea Biotec
HILLCHOL	Cholera, oral	Bharat Biotech
BIRSA 101	Sickle-cell disease, gene therapy	CSIR-IGIB

- December 2025 — Niger became the FIRST African country validated for eliminating onchocerciasis (river blindness).
- 2025 — Nepal was declared malaria-free.
- October 2025 — Maldives achieved triple elimination of mother-to-child transmission of HIV, Hepatitis B and syphilis.

TRAP

R21/Matrix-M is Oxford's malaria vaccine, made in India by the Serum Institute — it is NOT a Bharat Biotech or Bharat Immunologicals product. The 'which pair is NOT correctly matched' question in this area is usually built on R21.

Environment — COP30, wetlands, wildlife and heritage

Start with COP30. Held at BELEM in Brazil, in the Amazon, from 10 to 22 November 2025. President: Brazilian diplomat Andre Correa do Lago. The final decision package was named the 'GLOBAL MUTIRAO' — mutirao is a Brazilian-Portuguese word for collective community effort. Venue, president, package name. Those three are the question.

- COP30 called for **TRIPLING** adaptation finance by 2035.
- It created a new **JUST TRANSITION MECHANISM**.
- It launched a voluntary 'Global Implementation Accelerator'.
- It did **NOT** put a fossil-fuel phase-out roadmap in the decision text — the presidency promised separate voluntary roadmaps instead. That negative is the favourite statement-question trap.
- Simon Stiell is the Executive Secretary of the UNFCCC — do not confuse the Executive Secretary with the COP President.

The COP sequence you must be able to place

COP29 vs COP30 — do not mix these up

COP29 — Baku, Nov 2024	COP30 — Belem, Nov 2025
Remembered as the finance COP	Remembered for the 'Global Mutirao' package
New collective quantified goal on climate finance	Call to triple ADAPTATION finance by 2035
President Mukhtar Babayev	President Andre Correa do Lago
No just-transition body	New Just Transition Mechanism created

Now wetlands. A Ramsar site is a wetland of international importance under the Ramsar Convention of 1971. India crossed the century in 2026. As of August 2026 India has 101 Ramsar sites across 28 States and Union Territories, and the 101st is GLAW LAKE in Arunachal Pradesh, designated on 3 August 2026.

- Other 2026 additions: Chhari-Dhand (Gujarat, in Kutch), and Shekha Jheel, Patna Bird Sanctuary and Jai Prakash Narayan Bird Sanctuary — all in Uttar Pradesh.
- Largest Indian Ramsar site: Sundarban Wetland, West Bengal, about 4,230 sq km.
- Smallest: Renuka (Himachal Pradesh) and Vembannur (Tamil Nadu), 0.2 sq km each.
- Montreux Record is the list of Ramsar sites whose ecological character is under threat. India has TWO — Keoladeo Ghana National Park, Rajasthan (1990) and Loktak Lake, Manipur (1993).

Rajasthan's five Ramsar sites — learn all five with years

Site	District or area	Designated
Keoladeo Ghana National Park	Bharatpur	1981
Sambhar Lake	Jaipur-Nagaur-Ajmer	1990
Khichan	Phalodi — demoiselle crane wintering site	2025
Menar	Udaipur	2025
Siliserh	Alwar	2025

Rajasthan's five Ramsar sites on the map

Keoladeo is one of India's two Montreux Record sites; the other is Loktak, Manipur.

ASKED IN RAS

Keoladeo and Sambhar as Rajasthan's Ramsar sites were asked in RAS Pre 2016 and 2023. With Khichan, Menar and Siliserh added in 2025, the same question comes back with the count 'five'. If an option offers Chhari-Dhand as a Rajasthan site, reject it — that one is in Kutch, Gujarat.

Latest reported wildlife populations — four figures to memorise

Species	Number	Source and cycle
Tiger	3,682	All-India Tiger Estimation 2022
Leopard	13,874	2022, fifth cycle, NTCA-WII
Snow leopard	718	SPA1, 2019-23
Asiatic lion	891	2025 estimate, up from 674 in 2020

- India had 58 tiger reserves as of March 2025.
 - Project Cheetah: 53 cheetahs in India as of March 2026, including 33 India-born cubs, at Kuno National Park and Gandhi Sagar Sanctuary, both in Madhya Pradesh.
 - International Big Cat Alliance (IBCA) — formally established 12 March 2024, HEADQUARTERED IN INDIA, with Rs 150 crore of Indian support for 2023-28.
 - IBCA covers SEVEN big cats: tiger, lion, leopard, snow leopard, cheetah, jaguar and puma.
 - The 2022 All-India Tiger Estimation was itself a Guinness record exercise — the world's largest camera-trap wildlife survey.
-
- The Ancient Buddhist Site of SARNATH, Uttar Pradesh, was inscribed on the UNESCO World Heritage List in July 2026, at the 48th session of the World Heritage Committee held at Busan, South Korea.
 - Sarnath is India's 45TH World Heritage Site, inscribed under criteria (iii) and (vi) — the place of the Buddha's first sermon and the founding of the Sangha.
 - India ranks 6th in the world and 2nd in the Asia-Pacific region by number of World Heritage Sites (as of September 2026).
 - Keep the earlier Indian link ready: the 46th session of the World Heritage Committee was hosted by India at Bharat Mandapam, New Delhi, in July 2024.

CURRENT LINK

CURRENT LINK, as of September 2026: the Ramsar count (101) and the cheetah count (53) are both live numbers and can move before 6 December 2026. Check the Ramsar Convention website and PIB releases of the Ministry of Environment, Forest and Climate Change in the last week of November, then update these two figures in your revision sheet.

What in this chapter will have moved by December — and where to check

These notes were compiled in September 2026. Your exam is on 6 December 2026. That is about ten weeks in which several numbers above will change. Do not re-read the whole chapter in December — refresh only the items in this list.

- ISRO launches after 4 September 2026 — anything after EOS-05 is not in these notes. Check the mission list on isro.gov.in.
- The Ramsar count, 101 in August 2026 — every new designation moves it. Check ramsar.org and PIB.
- Cheetah numbers, tiger reserve count and any fresh tiger reserve notification — NTCA and MoEFCC releases.
- COP31, scheduled for November 2026 at Antalya, Turkiye, as settled at Belem. Its outcome lands weeks before your paper; note the decision's name and one headline outcome.
- Nobel Prizes 2026 — announced in the first half of October 2026. Learn 2025 and 2026 side by side.
- New DRDO tests, ship commissionings and any change of service chiefs after September 2026 — PIB Defence.
- Semiconductor units entering production, and any new IndiaAI or National Quantum Mission announcement.

CURRENT LINK

CURRENT LINK, as of September 2026: the 2026 Nobel Prizes had not been announced when these notes were written. Announcements run through the first half of October 2026. Add the 2026 laureates before you sit the paper — Physics, Chemistry and Medicine belong in this chapter, Peace and Literature in the awards chapter.

REVISION RECAP

1. CMS-03 on LVM3-M5, 2 Nov 2025, about 4,400 kg — heaviest communication satellite to GTO from Indian soil.
2. BlueBird Block-2 on LVM3-M6, 24 Dec 2025 — heaviest satellite lifted from Indian soil; AST SpaceMobile, a commercial NSIL mission.
3. PSLV-C62 failed on 12 Jan 2026, third stage PS3; payload EOS-NI with 14 co-passengers.
4. EOS-05 on GSLV-F17, 4 Sept 2026 — India's first imaging satellite in geosynchronous orbit; ISRO Chairman V. Narayanan.
5. Gaganyaan: uncrewed G1 on LVM3 carries Vyommitra; crewed flight targeted 2027.
6. Agni-5 MIRV test 8 May 2026, Dr APJ Abdul Kalam Island; MIRV = Multiple Independently Targetable Re-entry Vehicle.
7. AD-2 interceptor reached 'intercontinental class' in the 10-11 June 2026 BMD tests; NASM-MR about 350 km, maiden trial done.
8. Rudram-II about 300 km, Rudram-III about 550-600 km, Project Kusha 350+ km with induction targeted 2028-29.
9. AMCA is fifth-generation — RFP 27 May 2026, first flight 2032, deliveries 2035; C-295 assembly line at Vadodara.
10. 21 June 2026 — INS Dunagiri, INS Sanshodhak and INS Agray commissioned, each over 75% indigenous.
11. Defence production about Rs 1.78 lakh crore, exports about Rs 38,424 crore (up 63%); Army Chief Lt Gen Dhiraj Seth from 13 June 2026.
12. Vayushakti-26 at Pokhran; Ajeya Warrior-25 (UK) and Bold Kurukshetra (Singapore) in Rajasthan; Yudh Abhyas 2025 in Alaska.
13. India AI Impact Summit 16-21 Feb 2026 at Bharat Mandapam — New Delhi Declaration, 92 endorsements, over \$200 billion pledged.
14. Semicon 2.0 approved 15 July 2026, about Rs 1,27,500 crore; production running at Micron Sanand, CG Semi and Kaynes.

15. National Quantum Mission approved April 2023; 1,000 km quantum key distribution milestone announced April 2026.
16. COP30 at Belem, 10-22 Nov 2025, President Andre Correa do Lago, package 'Global Mutirao' — triple adaptation finance by 2035, no fossil-fuel roadmap.
17. 101 Ramsar sites as of August 2026, the 101st being Glaw Lake, Arunachal Pradesh; Rajasthan has five; Montreux Record has Keoladeo and Loktak.
18. Tigers 3,682, leopards 13,874, snow leopards 718, Asiatic lions 891; 58 tiger reserves; 53 cheetahs in March 2026.
19. IBCA established 12 March 2024, headquartered in India, covering seven big cats, Rs 150 crore for 2023-28.
20. Sarnath became India's 45th UNESCO World Heritage Site at the 48th session, Busan, July 2026; Nobel science 2025 — quantum circuits, MOFs, immune tolerance.
